

## DESCRIPTION

The pick-and-roll 's purpose is to setup a wide open layup through the use of a screen. If the defense over commits to the cutter, the screener becomes open.

**1.The (1) begins by dribbling towards the right elbow**

2. (1) waits for the (4) to set a screen on the left hand side. As this transpires, the (5) will move to the left side mid-post.

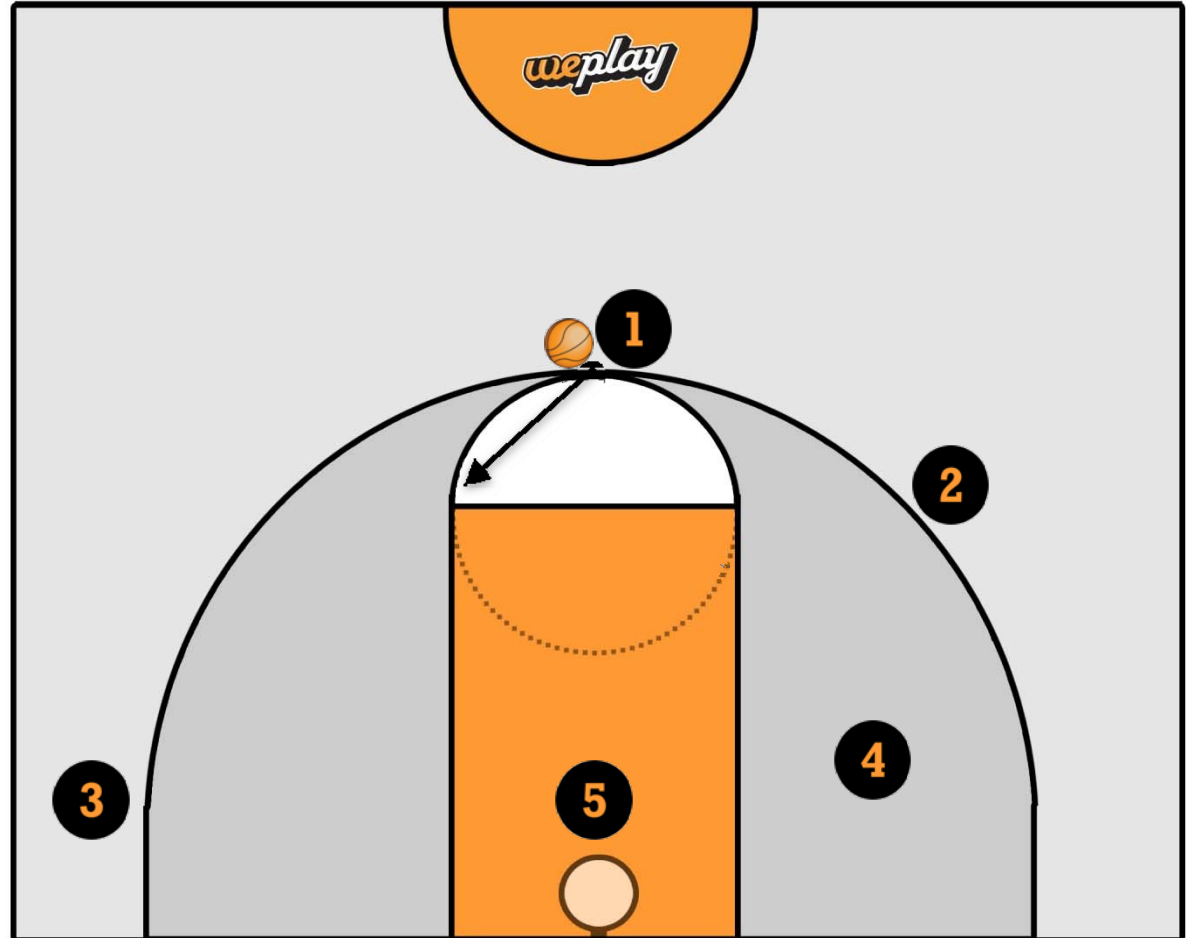

3.Once the screen is set, the (4) will roll toward the basket as the (1) curls around the screen to the basket.

4.The (1) 's primary option is to shoot if there is distance, drive if there is an opening and if the defense over-commits then pass to the (4) for a layup.
